

I implore you to establish a full Public Inquiry into the spraying of 1.3 million litres and 2 million lbs of dry chemical defoliants (Agent Orange, Purple and White) at Canadian Forces Base Gagetown, New Brunswick between 1956 and 1984. This atrocity has resulted in an uncounted number of deaths and / or caused multiple illnesses for those exposed and their families.

It is time to “DO THE RIGHT THING” and face the issue, not turn your back on your fellow Canadians.
